

CONCRETE > SELF-CONSOLIDATING CONCRETE

## **L-BOX TEST APPARATUS**

Code : B026

- The L-Box test is a key method for evaluating the passing ability and flow characteristics of self-compacting concrete (SCC).
- This test assesses the concrete's ability to flow through obstacles, such as reinforcement bars, without segregation or blockage, ensuring that it can achieve full compaction under its own weight.

### **TECHNICAL SPECIFICATIONS**

- Made of stainless steel
- Guillotine-form gate

**SUPPLIED WITH**

- 2 different obstacles:
  - 2 x Ø12 mm smooth bars having 59 mm gaps
  - 3 x Ø12 mm smooth bars having 41 mm gaps

**ORDERING INFORMATION**

Item	Code
L BOX TEST APPARATUS	B026X00XH
SLIDING GATE for L-BOX TEST APPARATUS	B026P001H
BAR BARRIER - 3 x Ø 12 mm	B026P002H
BAR BARRIER - 2 x Ø 12 mm	B026P003H
